

DataCompass

— GUIDING SMARTER FINANCIAL DECISIONS —

DataCompass

AI Spending Coach

Stop overspending before it happens.

The Problem

Traditional Banking Apps Are Reactive

- Show past spending
- Warn after budget is exceeded
- Rarely connect spending to goals
- Offer little personalization

Customers often notice overspending too late.

Our Solution

AI that helps customers before problems happen

The AI Spending Coach:

Predicts spending

Builds budgets

Sends alerts

Tracks savings goals

It helps shape the future.

Business Value

Benefits for customers and the bank

Customers

- Better budgeting
- More savings
- Fewer overdrafts

Business

- Higher engagement
- Better retention
- More product recommendations

DataCompass
— GUIDING SMARTER FINANCIAL DECISIONS —

Implementation

Phased Rollout

Phase 1

- Spending analysis
- Personalized budgets

Phase 2

- Spending predictions
- Cash-flow forecasting

Phase 3

- AI coaching
- Financial insights
- Personalized guidance

Privacy & AI

Secure, Transparent, User-Controlled

Customer-approved data only

Consent required for advanced features

AI recommends, not decides

Customers stay in control

DataCompass
— GUIDING SMARTER FINANCIAL DECISIONS —

User Experience

Personalized & interactive

Secure login

Custom budgets

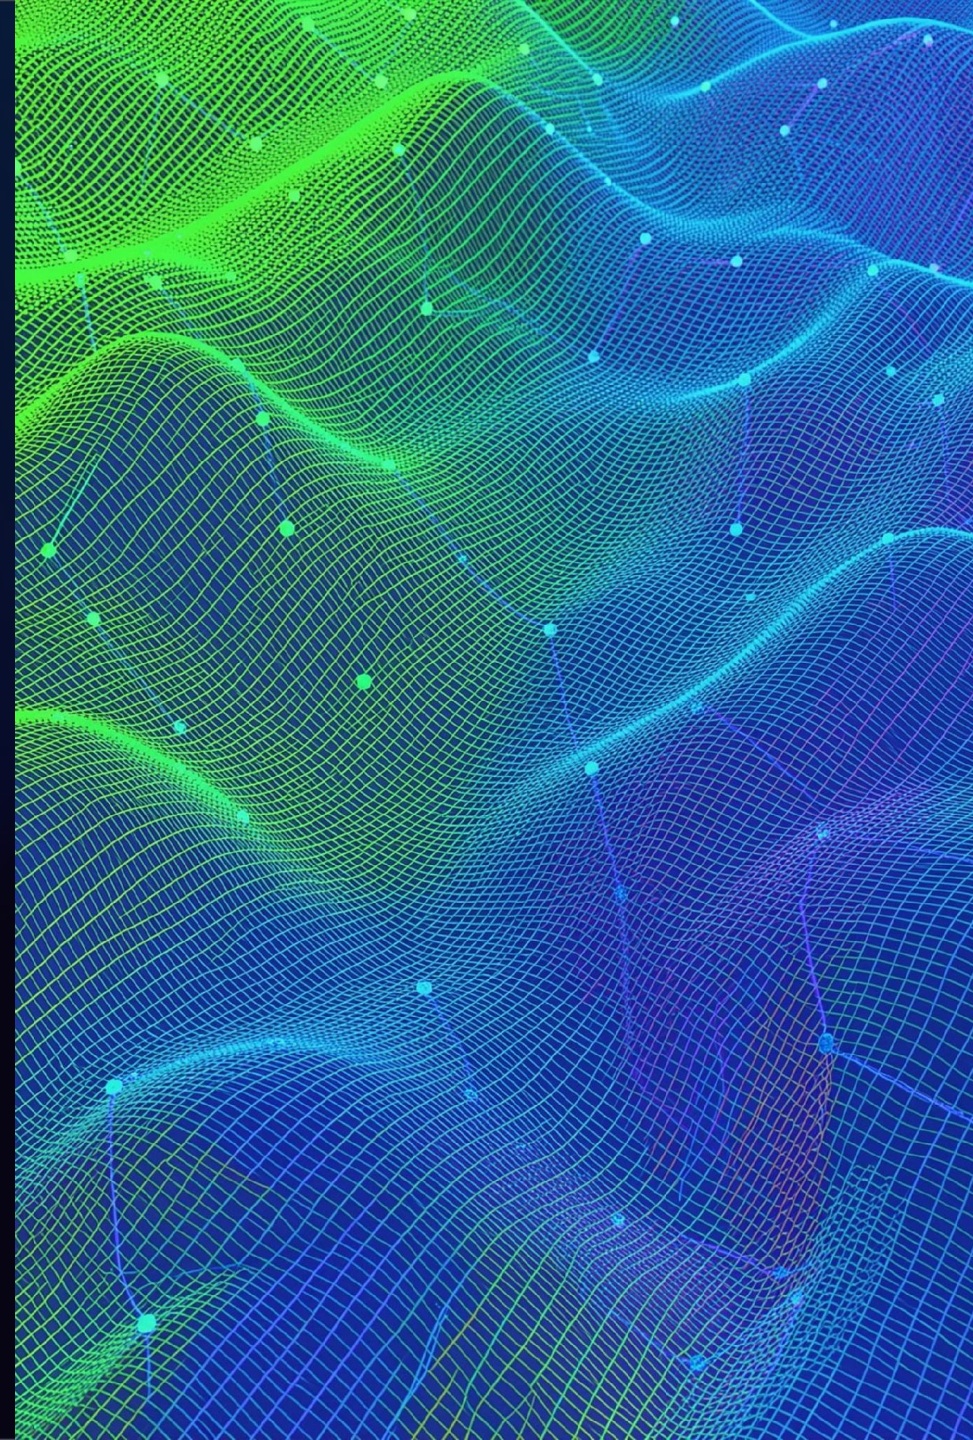

Daily spending planner

Savings preferences

Desktop and mobile

Smart Financial Tools

Key features of our AI Spending Coach:

Spending insights

Spending calendar

Savings tracker

AI recommendations

Real-time alerts

How It Works

Personalized Financial Planning

The AI analyzes:

- Income
- Spending history
- Bills
- Goals

Then it:

- Builds a budget
- Predicts expenses
- Suggests changes

Final Vision

The Future of Banking

Today:

Banking apps show what already happened.

Our Vision:

An AI coach that predicts spending and helps customers make smarter financial decisions.
